Dear Ronnie,

RE: RS Nano Flowers Air Purifier

I have been working in the Hotel Industry since 1981 and over this 25 years or more, there has never been a product introduced by any company that will eliminate bad or foul odor, cigarette smoke that lingers in guest rooms, function rooms, public areas or toilets. Air fresheners of all types were offered to cover up these smells which is not only temporary but harmful to health as all the ingredients consists of chemicals. The Housekeeper usually have a tough time in trying to solve these problems and the running cost involve in eliminating unpleasant smells.

This incredible product that you have introduced to under RS Nano Flowers is truly amazing. I have placed the specimen flowers in my office and just overnight, all the damp smell, unpleasant odor simply vanish when I enter the office. I then place the specimen into the guest room of Mimpian Jadi Resort and the result is the same. I place the same specimen into my bedroom and within 24 hours my wife was equally amazed with the result. The room doesn't have any other odor but smell of fresh air. I have placed the smaller specimen into the bathroom of my house and the damp and ammonia smell just disappear as long as the specimen is inside.

I have no doubt on the technology incorporated into these RS Nano flowers and the non toxic content of the product and the effectiveness and zero running cost. I will not hesitate to introduce this product to my fellow hotelier.

Thank you,

Yours truly,

Christopher Chan
